

TONKINESE BREEDING INFORMATION RESEARCH PROJECT

The Tonkinese BAC is very concerned about the diminishing Tonkinese gene pool and the limited number of unrelated lines.

To establish how many unique Tonkinese breeding lines there are in the UK the BAC is collecting essential data on the number of individual breeders we have and the breeding cats registered with the GCCF during the past five years - or more if you can. We are asking you to help with this vital survey by kindly completing this form; or you may just send in a copy of the pedigrees if you prefer. It would provide more useful information if you would also include any Tonkinese you have bought for breeding and any kittens you have sold for breeding.

This information will only be used for the purposes of research by the Tonkinese BAC to help support and sustain the Tonkinese breed.

YOUR NAME : _____

PREFIX (if any): _____

Breeding Cat Name (and owner's name if not yourself)	SEX	BREED NO.	REG NO. (Optional)	Date of Birth	Sire (incl Breed No)	Dam (incl Breed No.)
		TOS
